PA Digital to DPLA Crosswalk (Feb 2017)

PA Digital Label	PA Digital inbound property	PA Digital outbound property	PA Digital outbound stack	DPLA DC class	DPLA DC property	DPLA label	Portal Facet	Portal Display	API Facet	API sortable	Note
Subject	dc:subject	dc:subject		dpla:SourceResource	dc:subject	Subject	Y	Y	Y	Y	
Subject	dcterms:temporal	dc:subject		dpla:SourceResource	dc:subject	Subject	Y	Y	Y	Y	Incoming dcterms:temporal maps to dc:subject upon ingest into PA Digital aggregator
Type	dc:type	dc:type		dpla:SourceResource	dc:type (where element = DCMI Type)	Type	Y	Y	Y	Y	Local mapping from non-DCMI to DCMI type is done manually at seed config where necessary. In DPLA crosswalk, this element includes only where value is DCMI Type.
Type	dc:type	dc:type		dpla:SourceResource	dc:format	Format	N	Y	Y	Y	In DPLA crosswalk, this element should include only where value is not DCMI Type, but it is including all values. Gretchen was made aware of this during initial QA.
Format	dc:format	dc:format		edm:WebResource	dc:format	File Format	N	N	N	N	
Contributing Institution	supplied-default	dc:contributor	last occurrence	ore:Aggregation	edm:dataProvider	Data Provider	Y	Y	Y	N	Label is "Data Provider" in DPLA crosswalk docs, but "Contributing Institution" in DPLA portal; PA Digital field "Contributing Institution" may also be mapped from dc:creator, dc:publisher, dc:contributor, or dc:source at seed config
Intermediate Provider	supplied	dc:source		ore:Aggregation	dpla:intermediateProvider	Intermediate Provider	Y	Y	Y	N	This field populates the local PA Digital Source field so appears as duplicate in the PA Digital portal; only one instance of this value is outbound. Though DPLA crosswalk docs indicate this has DPLA label "Intermediate Provider", this displays as "Contributing Institution" in DPLA portal. Gretchen was made aware of this during initial QA.
Collection Name	supplied	dc:relation	first occurrence	dpla:SourceResource	dcterms:isPartOf	Collection	N	N	Y	Y	Following occurrences of dc:relation are populated by incoming dc:relation field from source metadata if present
Language	dc:language	dc:language		dpla:SourceResource	dc:language	Language	Y	Y	Y	Y	
Publisher	dc:publisher	dc:publisher		dpla:SourceResource	dc:publisher	Publisher	N	N	N	N	
Creator	dc:creator	dc:creator		dpla:SourceResource	dc:creator	Creator	N	Y	N	N	
Contributor	dc:contributor	dc:contributor	before last occurrence	dpla:SourceResource	dc:contributor	Contributor	N	N	Y	Y	Last occurrence of dc:contributor is reserved for Contributing Institution; where only one occurrence of dc:contributor is found, this maps to Data Provider in DPLA crosswalk
Date	dc:date	dc:date		dpla:SourceResource	dc:date	Date	Y	Y	N	N	
Date	dcterms:created	dc:date		dpla:SourceResource	dc:date	Date	Y	Y	N	N	Incoming dcterms:created maps to dc:date upon ingest into PA Digital aggregator
Date	dcterms:issued	dc:date		dpla:SourceResource	dc:date	Date	Y	Y	N	N	REQUESTED - Incoming dcterms:issued maps to dc:date upon ingest into PA Digital aggregator

PA Digital to DPLA Crosswalk (Feb 2017)

PA Digital Label	PA Digital inbound property	PA Digital outbound property	PA Digital outbound stack	DPLA DC class	DPLA DC property	DPLA label	Portal Facet	Portal Display	API Facet	API sortable	Note
Identifier	dc:identifier	dc:identifier	first occurrence	[Not used by the DPLA/Not displayed in PA Digital PROD]							Contains record identifier for internal maintenance. Value for this field is determined by repository type set at seed config. It is in our outbound feed but is not used by the DPLA and is not visible in the PA Digital production aggregator interface.
Identifier	dc:identifier	dc:identifier	second occurrence	ore:Aggregation	edm:isShownAt	Is Shown At	N	Y	Y	Y	Contains URL back to object in contributor's local system. Selection of originating element for this field is determined by repository type set at seed config.
Identifier	dc:identifier	dc:identifier	last occurrence	ore:Aggregation	edm:preview	Preview	N	Y	Y	Y	Contains thumbnail for object. Selection of originating element for this field is determined by repository type set at seed config.
Source	supplied	dc:source		ore:Aggregation	dpla:intermediateProvider	Contributing Institution	Y	Y	Y	N	This field is populated from local PA Digital "Intermediate Provider" field so appears as duplicate in the PA Digital portal; only one instance of this value is outbound. Though DPLA crosswalk docs indicate this has DPLA label "Intermediate Provider", this displays in "Contributing Institution" in DPLA portal. Gretchen was made aware of this during initial QA.
Relation	dc:relation	dc:relation	after first occurrence	dpla:SourceResource	dc:relation	Relation	N	N	N	N	First occurrence of dc:relation is reserved for local PA Digital Collection Name field; where only one occurrence of dc:relation is found, this maps to Collection in DPLA crosswalk
Coverage	dc:coverage	dc:coverage		dpla:SourceResource	dcterms:spatial	Place	Y	Y	Y	Y	
Coverage	dcterms:spatial	dc:coverage		dpla:SourceResource	dcterms:spatial	Place	Y	Y	Y	Y	Incoming dcterms:spatial maps to dc:coverage upon ingest into PA Digital aggregator
Rights	dc:rights	dc:rights		dpla:SourceResource	dc:rights	Rights	N	Y	N	N	
Rights	dcterms:RightsStatement	dc:rights		dpla:SourceResource	dc:rights	Rights	N	Y	N	N	
Rights	dcterms:license	dc:rights		dpla:SourceResource	dc:rights	Rights	N	Y	N	N	
Title	dc:title	dc:title		dpla:SourceResource	dc:title	Title	N	Y	N	Y	
Description	dc:description	dc:description		dpla:SourceResource	dc:description	Description	N	Y	N	N
